English, German, Kannada

CAREER OBJECTIVE

Software engineer with ability to learn and collaborate in rapidly changing environments and compositions. Worked through 1000+ hours of bootcamp structure, learning Html, CSS, JavaScript, NodeJs and ReactJs. Eager to tackle web development/design challenges to achieve lasting impacts on user experience.

UNIVERSITY PROJECT

Collaborative Filtering Based Recommendation of online social Voting.

Team Size: 4 Project Duration: 3 Month; 2018

Developing an OSN (online social network) and creating a voting platform, providing right voting for right users.

Social voting is an emerging new feature in online social network. It poses unique challenges & opportunity for recommendation. We develop a set of matrix factorization & nearest-neighbor based recommender system that explore user social network & prepare a path to right voting for right user.

TRAINING

12/2021 – 03/2022 : Certified Front end development with React JS from Infocampus, Bangalore, India.
